

The 2nd of the LDM going on an adventure!

The 2nd of International and European Section went on a Boot Camp on the 3rd to the 5th December to improve their English and oral skills! This is how it went:

The Facilities

The students arrived at the Palmiste hotel around 11.30 am. Everyone was assigned a room that they would share with one to four students of their choice. They discovered the reception, the pools, the restaurant, obviously their rooms and even the jacuzzi!

The Workshops

After lunch, workshops had been organized and the students attended them in groups of 20.

The five workshops were:

- Discourse Analysis: where the pupils were helped to understand Obama's vs Trump's speeches
- The importance of Body Language: where they did some acting to get better at expressing themselves
- Stress Management: where they did some relaxation exercises and Taiichi with Mr. Chummun
- Reporting Skills: where they learned how to report and write an article. Actually, this is the result of this workshop.
- Communication Skills: where they learned the keys to a good communication.

The Team Spirit

On the second day, the teens went on the Trou aux Biches public beach to have activities to create a team spirit with an animation team.

In the morning, they did some little activities to win equipment to build a kite: the team who could fly it higher won!

And in the afternoon, after lunch at the hotel, they came back for some other games still in teams. Then the animateurs counted the points and told the ranking.

To sum up, everyone one had a lot of fun: from the students to the teachers! Unanimously, all the students can't wait for an other camp like this one!
